

Dyneema Covert Body Armour Vest

NIJ IIIA Ballistic and knife protection in a concealed format.

This NIJ IIIA covert body armour vest is designed for protection against 9mm and .45 firearms and offers good ballistic / knife (plus hypodermic needles, broken bottles etc) protection for vital organs whilst maintaining a low profile.

Comfort and fit

Designed by our own Special Forces advisor and used by a number of UK Government departments, this Dyneema Covert Body Armour Vest is fully adjustable in four point, sides and shoulders for a better, closer fit.

We have included our airflow system, this makes wearing the vest in hot environments much more bearable. We recommend that our vests be worn in conjunction with under armour shirts to give a better feel and to aid in heat management. An ideal vest for use in the Middle East of Africa.

This Dyneema covert vest offers great side protection while maintaining a low profile and pockets for our ballistic plate are fitted as standard to an easy upgrade for changing operational requirements; with the addition of ballistic plates; enabling the vest to stop 7.62 AP Rifle rounds.

Our Dyneema Vests are manufactured in the UK and conform with NIJ IIIA, STANAG 2920 and/or Home Office testing standards, HG2 (PSDB Ballistic Standard - Body Armour (1995)).

Dyneema Covert Body Armour Vest, lighter than Kevlar

Being manufactured from Dyneema makes this Dyneema Covert Body Armour Vest lighter than Kevlar while still giving the same level of protection.
