

Tactical Dyneema Body Armour Vest

This Tactical Dyneema body armour vest offers the comfort and design of modern body protection made to be low profile and deliver freedom of movement.

Intelligent Armour Limited has supplied this body armour vest to the FCO, HMRC & DFID, as well to a number of specialist units.

Our Dyneema body armour vest features our airflow system, this makes wearing the vest in hot environments much more bearable. We recommend that our vests be worn in conjunction with under armour shirts to give a better feel and to aid in heat management.

Our Dyneema Vests are manufactured in the UK and conform with NIJ IIIA, STANAG 2920 and/or Home Office testing standards, HG2 (PSDB Ballistic Standard - Body Armour (1995)).

Shoulder and side straps for comfort and steadiness

The reinforced shoulder straps relieve pressure on the shoulders caused by the weight of heavier tactical anti-rifle plates. The large side straps keep the entire vest steady, and in place.

Increase your protection levels

The Dyneema Tactical Body Armour Vest can be further armoured with the use of ballistic plates to give a protection level up to NIJ IV or PSDB .RF1

Features:

- Protection levels up to NIJ IIIA or PSDB HG2
- Lightweight, thin flexible Dyneema armour
- Maximum protection surface
- Back, front and side ballistic protection
