

Women's Dyneema Body Armour Vest

Women's Dyneema Body Armour Vest, NIJ IIIA armour vest, low profile and ultra lightweight and tailored cut for fit

This NIJ IIIA tactical women's Dyneema body armour vest with level NIJ IV curved plates offers the comfort and design of modern body protection made to be low profile and deliver freedom of movement.

The vest has been tailored to fit cup size to aid in comfort and movement.

Intelligent Armour Limited produced this vest in the first instance at the request of the FCO, who did not have suitable tactical body armour vests for staff operating in the Middle East. We designed the vest to be as lightweight as possible, while tailoring it to suit female cup sizing.

Since we launched this vest with its curved and contoured NIJ IV Ballistic plates, we have supplied it to a number of Government departments including HMRC & DFID as well as a number of female close protection officers.

Comfort and fit

The reinforced shoulder straps relieve pressure on the shoulders caused by the weight of heavier tactical anti-rifle plates. The large side straps keep the entire vest steady, and in place.

We have included our airflow system, this makes wearing the vest in hot environments much more bearable. We recommend that our vests be worn in conjunction with under armour shirts to give a better feel and to aid in heat management.

Women's NIJ level IV Plates included

The tactical women's Dyneema body armour vest includes a curved and contoured front plate in NIJ IV protection level and a level NIJ IV back plate. Both plates are included within this package.
